Time Management(JKC)

Time management is the coordination of tasks and activities to maximize the effectiveness of an individual's efforts. Essentially, the purpose of time management is to enable learners to get more and better work done in less time. Elements of time management include organization, planning and scheduling to best take advantage of the time available. Time management techniques also take into account an individual's particular situation and their relevant capabilities and characteristics. The most effective objective is one that is tailored to the job learners are applying for. It states what kind of career you are seeking through applying the correct time management to secure a challenging position in a reputable organization to expand one's learnings, knowledge, and skills. Secure a responsible career opportunity to fully utilize learners training and skills, while making a significant contribution to the success of the students as well as learners.

Objectives of Event:

- To Know the ability to assign meaning to time, letting people make the most of their time.
- To develop time management skills to help employees deliver quality work and meet their goals effectively.
- Securing a responsible career opportunity to fully utilize my training and skills, enables students to become more confident, and organized, and learn more efficiently.
- To develop the skills of time management something that learner plan to do or achieve.
