DEPARTMENT OF MATHEMATICS

REPORT ON STUDENT SEMINARS

Conduction of seminar is crucial and essential for students.

Seminar creates interest in student understanding by means of better teaching aids compare to normal class room session.

Objectives:

- To identify practical learning skills and concepts that will promote student's academic success
- To enhance communication and soft skills for overall development of students

In the month of November, 2022 student seminar was organized for II B. Sc. students on the topic Abstract Algebra by the department of Mathematics to promote student centric learning methods.

Students participated actively in the seminar with Power point presentations on the topic allotted to them.
