## **SULLURPET, SPSR NELLORE DISTRICT, ANDHRA PRADESH**

### **SUMMARY REPORT: 2020-21**

## **QUANTITATIVE APTITUDE**

The Department of Mathematics developed an Add-on programme called Quantitative Aptitude for the academic year 2020–21 in accordance with the college's policy to improve students' employability skills. The 30-hour course is scheduled to run from 01 November 2021 to 21 December 2021. Only seventeen of the twenty B.Sc. students in their final year who registered for the programme actually finished it. The institution certified those who met the requirements. The course's primary goal is to equip students with the skills they need to succeed in a variety of competitive exams. The section on quantitative aptitude is significant in India's competitive exams for jobs. Specifically, the Quantitative Aptitude section is one of the most important sections in recruitment exams in India, including but not limited to Banking, Railways, Staff Selection Commission, insurance, teaching, UPSC, and many other professions. Many businesses use aptitude tests, both online and offline, when hiring new employees. As a result, having a strong quantitative aptitude is crucial for employment. Generally speaking, developing logical thinking skills through aptitude study will improve students' mental abilities.
